

WE CLAIM

1. A hand held personal digital assistant including information storage means, display means, in-built printer means, control means allowing a user to selectively retrieve and display information from said storage means on said display means and to print said information using said printer means and means allowing a user to enter and store new information in said information storage means.
2. The personal digital assistant of claim 1 wherein said printer means includes a monolithic pagewidth printhead.
3. The personal digital assistant of claim 2 wherein said printhead is an ink jet printhead.
4. The personal digital assistant of claim 1 wherein said printer means includes a supply of print media disposed within said personal digital assistant.
5. The personal digital assistant of claim 1 including a body section connected to said display means through a hinge joint, said body section housing said information storage means and said control means, wherein at least a portion of said printer means is disposed in said hinge joint.
6. The personal digital assistant of claim 5 including a supply of print media disposed in said hinge joint.
7. The personal digital assistant of claim 6 including a releasable cover portion through which a portion of said printer means including said print media and/or an ink cartridge can be removed.
8. The personal digital assistant of claim 5 wherein said printer means includes a monolithic pagewidth printhead.

9. The personal digital assistant of claim 8 wherein said printhead is an ink jet printhead.
